Education

PhD in Astrophysics (Ongoing)
International Max Planck Research School on Astrophysics (IMPRS)
Max Planck Institute for Astrophysics (MPA), Garching, Germany
Ludwig Maximilians University (LMU), Munich, Germany
Duration: 2021-Present

Master of Science
Indian Institute of Science (IISc), Bengaluru, India
Major: Physics
Duration: 2020-2021

Bachelor of Science (Research)
Indian Institute of Science (IISc), Bengaluru, India
Major: Physics
Duration: 2016-2020

Senior Secondary (CBSE), 2016
Kendriya Vidyalaya No-4, Bhubaneswar, India
Stream: Science
Date: 21/05/2016

Research Experience

The dynamics of magnetized, multiphase gas in a turbulent environment [8 SEP 2021 - PRESENT]
We are studying the different aspects of multiphase gas, like survival, morphology and growth, in a turbulent medium in presence of magnetic fields.
We use idealised MHD simulations run using Athena ++ for this study.
Doctoral Advisor: Max Gronke

Max Planck Institute for Astrophysics, Garching

Role of temperature and metallicity in the evolution of thermal instability [1 AUG 2019 - PRESENT]
In this project we investigate the role of different parameters like metallicity and temperature in the growth of thermal instability. The project includes setting up and running simulation for study of thermal instabilities using PLUTO. This work led to some important insights into evolution of large-scale isochoric clouds.

This project contributed towards my Bachelors thesis and led to a research paper in collaboration with Dr. Prakriti Pal Choudhury and Prof. Prateek Sharma.
Under supervision of: Assoc. Prof. Prateek Sharma

Physical Sciences, Indian Institute of Science, Bangalore

Computational Studies of Systems of Self-driven Particles
[8 MAY 2019 – 12 JUL 2019]
This project aimed at investigating the underlying physical origin of this "phase transition" via the development of appropriate computational models
Project included:
- Molecular dynamics code development (in LAMMPS), adapting existing code in the research group
- Reproduction of literature data
- Original investigation of the role of friction in the interparticle interaction

Under supervision of: Assoc. Prof. Massimo Pica Ciamarra
School of Physical & Mathematical Sciences, Nanyang Technological University, Singapore

Electrostatics of Spherical Topological Insulators
[1 MAY 2018 – 30 JUN 2018]
Theoretical derivation of electric and magnetic scalar potentials for different cases of electric and magnetic fields near a spherical Topological insulator.
Presented the project at 3rd Annual Undergraduate Research showcase at IISc.

Under supervision of: Assoc. Prof. Subroto Mukerjee
Physical Sciences, Indian Institute of Science, Bangalore

Analysis of data from CERN 2010 open data and simulation of top pair production [1 MAY 2017 – 31 JUL 2017]
It consisted of accessing CERN 2010 open data using CernVM and analysing the data using C++ and Python code incorporating ROOT to plot Dimuon spectra, Trimuon spectra and other related plots.
High-energy particle physics event simulations of top pair production were done using Pythia 8.2 and Madgraph 5.

Under supervision of: Asst. Prof. Jyothsna Rani Komaragiri
Centre for High Energy Physics, Indian Institute of Science, Bangalore

Publications

Shatter or not: role of temperature and metallicity in the evolution of thermal instability
Hitesh Kishore Das, Prakriti Pal Choudhury, Prateek Sharma
arXiv: arxiv.org/abs/2009.11317
Journal: Under Review in Monthly Notices of the Royal Astronomical Society

Conferences and Seminars

Lyman-X Day: ORIGINS workshop (October 5, 2022)
Attended in-person at European Southern Observatory (ESO), Garching
The National Astronomy Meeting (NAM) 2022 (July 11-15, 2022)
Attended virtually and submitted a poster for the parallel session "Non-equilibrium thermodynamics across scales: from the solar corona to the intracluster medium".
Gas Flows around Galaxies: ORIGINS workshop (May 24, 2022)
Presented my work in-person at MPA, Garching
Presision Presidency Physics Summit organized by Presidency University, Kolkata (September 11-13, 2020)
Presented work done on Thermal Instability as a talk in the Undergraduate Symposium
"On the Origin, Nature, and Mixing of Multiphase Gas in Astrophysics" KITP online conference (October 15-16, 2020)
Attended the conference virtually -
IAP online Colloquium on Intracluster Medium/Circumgalactic medium (June 22-26, 2020)
Attended the conference virtually

Extra-curricular Experience

13th IMPRS Symposium
Was involved in organising the 13th IMPRS Symposium as the Chair of the Local Organising Committee.

Undergraduate Physics Club
Delivered a talk on "Special Relativity and Minkowski Diagrams".

IISc Open Day
Constructed and demonstrated an experiment about Bernard cells, convection and convection cells in Sun
Demonstrated an experiment about Polarization of light

Institute Fest - "Pravega"
Involved in planning and conducting events by Physics club for Pravega - 2016 and Pravega - 2017.
Event coordinator of "Vacuum cannon" event in Pravega-2017

Awards and Fellowships

Kishore Vaigyanik Protsahan Yojana (KVPY) Fellowship
Funded by: Department of Science and Technology, Government of India
Stream: SX
Duration: 2016-2021

National Cyber Olympiad 2014-15
National Rank: 1 (in 11th standard)
Organised by: Science Olympiad Foundation

National Standard Examination in Astronomy, 2015
Got certificate for being in top 10% of the examination centre.
Organised by: Indian Association of Physics Teachers (IAPT)

Skills

C, C++	Python
PLUTO	Athena++
LAMMPS	ROOT
Madgraph 5	Pythia 8.2
LaTeX	SQL
Mathematica	Matlab
High Performance Computing	Bash scripting

Languages

English (Proficient)
Hindi (Proficient)
Odia (Native)
German (Beginner)
