## Education

### **PhD in Astrophysics} (Ongoing)**

International Max Planck Research School on Astrophysics (IMPRS)

Max Planck Institute for Astrophysics (MPA), Garching, Germany

Ludwig Maximilians University (LMU), Munich, Germany

Duration: 2021-Present

### **Master of Science}**

Indian Institute of Science (IISc), Bengaluru, India

Major: Physics

Duration: 2020-2021

### **Bachelor of Science (Research)} Indian Institute of Science (IISc), Bengaluru, India**

Major: Physics

Duration: 2016-2020

## Research Experience

### **The dynamics of magnetized, multiphase gas in a turbulent environment**

[ 8 SEP 2021 - PRESENT ]

We are studying the different aspects of multiphase gas, like survival, morphology and growth, in a turbulent medium in presence of magnetic fields. We use idealised MHD simulations run using Athena++ for this study.

Doctoral Advisor: Dr. Max Gronke

Formal supervisor: Prof. Volker Springel

Max Planck Institute for Astrophysics, Garching

### **Role of temperature and metallicity in the evolution of thermal instability**

[ 1 AUG 2019 - PRESENT ]

This project contributed towards my Bachelors thesis and led to a research paper in collaboration with Dr. Prakriti Pal Choudhury and Prof. Prateek Sharma.

Under supervision of: Assoc. Prof. Prateek Sharma

Collaborator: Dr. Prakriti Pal Choudhury Physical Sciences, Indian Institute of Science, Bangalore

### **Computational Studies of Systems of Self-driven Particles**

[ 8 MAY 2019 – 12 JUL 2019 ]

This project aimed at investigating the underlying physical origin of this “phase transition” via the development of appropriate computational models.

Under supervision of: Assoc. Prof. Massimo Pica Ciamarra

School of Physical & Mathematical Sciences, Nanyang Technological University, Singapore ->

## Publications

### - Magnetic Fields in Multiphase Turbulence: Impacts on Dynamics and Structure

Hitesh Kishore Das, Max Gronke

arXiv: [2307.06411](https://arxiv.org/abs/2307.06411)

### - Shatter or not: role of temperature and metallicity in the evolution of thermal instability

Hitesh Kishore Das, Prakriti Pal Choudhury, Prateek Sharma

**Journal:** Monthly Notices of the Royal Astronomical Society, Volume 502, Issue 4, April 2021, Pages 4935–4952, [doi.org/10.1093/mnras/stab382](https://doi.org/10.1093/mnras/stab382)

arXiv: [2009.11317](https://arxiv.org/abs/2009.11317)

## Conferences and Seminars

- **Modelling of Multiphase Astrophysical Media** (May 30-June 2, 2023)  
Presented a ~15 min talk about my work. In-person at Aspenstein Castle, near Lake Kochel, Germany
- **MPA weekly Institute Seminar** (May 15, 2023)  
Presented a ~45 min talk about my work. In-person at MPA, Garching, Germany
- **52nd Saas-Fee winter School on “The Circum-Galactic Medium across cosmic time: an observational and modelling challenge”**  
(March 19-24, 2023)  
Presented a poster about my work. In-person at Les Diablerets, Switzerland
- **Team meeting for “Observe Local Think Global: What Solar Observations can teach us about Multiphase Plasmas across Astrophysical Scales”**  
(March 13-17, 2023)  
Presented an introduction for simulations in ICM/CGM, and my work. In-person at ISSI, Bern, Switzerland
- **The Multiphase Circumgalactic Medium** (February 26- March 3, 2023)  
Presented a ~15 min talk about my work. In-person at Ringberg Castle, Germany
- **Lyman-X Day: ORIGINS workshop** (October 5, 2022)  
Attended in-person at European Southern Observatory (ESO), Garching
- **The National Astronomy Meeting (NAM) 2022** (July 11-15, 2022)  
Attended virtually and submitted a poster for the parallel session “Non-equilibrium thermodynamics across scales: from the solar corona to the intracluster medium”.
- **Gas Flows around Galaxies: ORIGINS workshop** (May 24, 2022)  
Presented my work in-person at MPA, Garching
